

INSTRUCTION MANUAL

INSECT TRAP LAMP

MODEL NO.: Ultratech 30

**PLEASE READ CAREFULLY THIS MANUAL BEFORE USE.
PLEASE KEEP THIS MANUAL.**

INSECT TRAP LAMP

Insect trap lamp is one of the most effective ways in professional insect control. While most flying insects are phototactic, they respond most to UV-A lights with a 365 nm peak wavelength in the light spectrum. The insect trap lamp model Vinco 215 is fitted with professional UV-A lamps to attract flying insects. Attracted insects will be trapped on the glue board when flying into the appliance. Vinco 215 provides silent and eco-friendly insect control. It is ideal for hotels, restaurants, cafés, warehouses, stables, food stores, food industries and any food preparation areas.

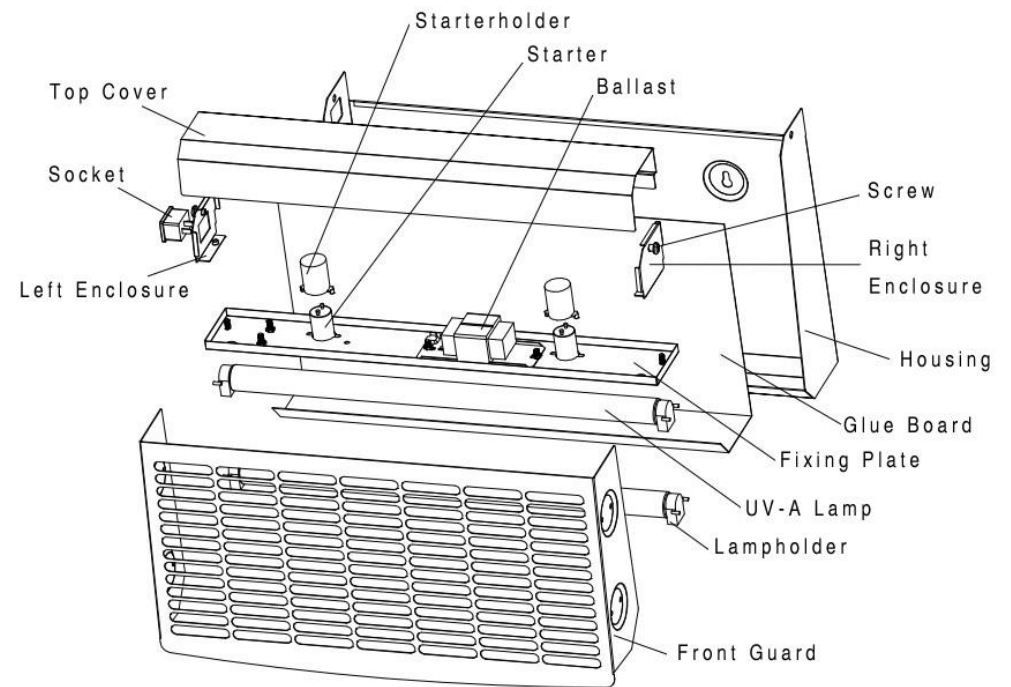

WARNINGS

- Make sure your local mains supply is suitable for the appliance.
- The appliance is for INDOOR use only.
- Hang or mount the appliance on a place where children can't reach. (≤ 2.0 m)
- Make sure to peel off the cover paper on glue board before use.
- For hygiene reason, glue board should be replaced at least once per month
- Never remove any fixed part of the appliance to make any internal adjustment.
- If the power cord, lamp or other part of the appliance is damaged, please contact immediately the manufactory, distributor or service agent to replace it in order to avoid a hazard.
- Repair should be carried out by qualified electricians only.
- Unplug the appliance before cleaning, replacing lamps or repairing the appliance.
- Make sure of earth connection to prevent damage or danger.
- No washing by water, no placing in the rain.
